

Tongue development

Lingual musculature stems from **muscle cells** that immigrate from the **occipital somites** into the tongue. The emigrating predecessor cells follow the **hypoglossal nerve (CN 12)**.

Innervation of the tongue

Sensitivity: (touch)

Anterior two-thirds of the tongue

1. Pharyngeal arch

N. lingualis (CN V₃)

Posterior third of the tongue

3. Pharyngeal arch

N. glossopharyngeus (CN IX)

Tongue base

4. Pharyngeal arch

N. vagus (CN X)

Sensorial: (taste)

Anterior two-thirds of the tongue

2. Pharyngeal arch

Chorda tympani (CN VII)

Posterior third of the tongue

3. Pharyngeal arch

N. glossopharyngeus (CN IX)

4. Pharyngeal arch

N. vagus (CN X)

Motor: (movement)

Entire musculature

6. Pharyngeal arch

N. hypoglossus (CN XII)
